## Student job in software development, Leipzig

### Description

We are searching for students who help us with the development of mobile and web-based applications:

- who accompany us developing new concepts, designs and various prototypes and software applications in a financial services environment
- who are interested in programming mobile and web-based applications (front-end, application and data layers) using front-end, web and middleware frameworks
- who think out of the box, communicate well and can convince with excellent solutions

Your profile:

- you have fun, interest and possibly first practical experience in software development, preferably in mobile and web-based application development
- you have at least basic knowledge of object-oriented programming, e.g. with Java, C ++, Objective-C / Swift
- you are a student in any subject, preferably related to IT
- you enjoy new challenges and are reliable

We offer you:

- working 15-20 hours per week
- an innovative and challenging work environment in a FinTech and banking start up
- interesting projects with big clients and in the field of prototype development
- the opportunity to get involved and set your own emphasis in our sales support
- performance-linked wage
- flexible working hours and individual work space design
- free drinks and regular group events
- personal development in flat hierarchies
- fruits, coffee and water for free
